

A detailed cross-sectional view of a mechanical assembly, likely a valve or actuator. The diagram shows a central cylindrical component (1) with a helical spring (6) around it. A piston or plunger (5) is positioned within the cylinder, with a seal (18a, 18b) at its base. A control rod (19a) is connected to the piston. A lever arm (14a, 14b) is pivoted on a support (13a, 13b) and is connected to the piston. A spring (4) is also shown. Various other components are labeled with numbers 1 through 20.
